

Data Distributions/Inv. 2 Overview

Stem and Leaf Plots

D.RE.07.01b

***Represent and interpret data using stem and leaf plots*

Investigation Two - Experimental and Theoretical Probability

D.AN.08.01

Determine which measure of central tendency (mean, median, mode) best represents a data set, e.g., salaries, home prices, for answering certain questions; justify the choice made

D.AN.07.04

Find and interpret the median of a given set of data

Statistics

D.AN.07.03

Calculate and interpret relative and cumulative frequencies for given data sets
